Abstract

The abstract should be not more than half page, single paragraph (approximately 100-300 word), just summarizes the work. Use Times new roman font in text in the abstract with size 12. Note that all text in the report should be justified.

**Note:** These contents only give an example. The word document can insert this list of content automatically.
Chapter 1

Introduction

Leave three spaces between the main header and the first sub header in each chapter

1.1 Introduction

This chapter should include the following:

1. The aim of the project (state the problem)
2. Background information relevant to the project goal and content.
3. Scope of the project (summary of the main work)
4. Structure of the report
5. Literature review of the previous work

Note: the following point is not necessary to be in the aforementioned order, feel free to present your own order.

1.1.1 Sub sections included.
Chapter 2

Background and Theory

This chapter gives details on the theory and background that related to the subject of the project. This may include: a mathematical derivation, model explanation, brief introductory,..., etc.

Note: This chapter consists of 5-8 pages only.
Chapter 3

Project Implementation

Only the own work of the students on the project should be presented in this chapter. This may include the following:

1- Simulation of the Model/ Mathematical modelling of the system.
2- Statistical data analysis/ Data collection.
3- System design explanation.
4- Simulation / Experimental results and discussions.
5- Program/ Code development / flowchart descriptions/ Pseudo code implementation.
6- Model Simulation / Practical work descriptions.
Chapter 4

Conclusion and Future work

This chapter should summarize and highlights main goal of the project (the achievements of the study). Future work which depends on the work of the project should also be presented in this chapter.

Note: use present perfect tense in the conclusion section. For example, “This study has demonstrated a procedure of digital control design for DC motor …”. This chapter consists of 1-2 pages only.
